

BEYOND THE STANDARD MODELS: Particle Physics Meets Cosmology

3-28 October 2022 , IFT UAM-CSIC, Madrid

We aim to bring together experts in particle physics and cosmology working on BSM physics. We plan to discuss all aspects of BSM physics and cosmology, including in particular the hierarchy problem and electroweak symmetry breaking, gravitational waves, dark matter, inflation and reheating, the cosmological constant and axions.

Organizers:
Guillermo Ballesteros
Csaba Csáki
Javi Serra
Géraldine Servant
